

WIND POWER

Supply Chain Directory

OKLAHOMA

DEPARTMENT *of* COMMERCE

Oklahoma - the heart of the wind corridor.

With a centralized U.S. location, immediate proximity to wind projects, and a position in the heart of the wind corridor, Oklahoma is the ideal site for wind generation, tower and blade production, turbine component manufacturing, repair and maintenance operations, and industry R&D.

While other states over the years have experienced shrinking and struggling advanced manufacturing sectors, Oklahoma's manufacturers continue to expand and thrive. From castings, machining, bearings and gears to forges, fabrications and suspended climbing systems, your potential suppliers are right here in Oklahoma.

Project Management & Construction
